

## **Lab Task 1**

1. Create a GitHub repository named LabTask1. It must contain:

- One uploaded file (from your desktop's folder) using git bash
- At least one commit / One updated message
- Show Pull operation using git bash

### **Instructions:**

1. Complete this task in a timely manner.

2. After completing the task, then you need to take the screenshots of your command and necessary folder/repository one by one. And save all these images in a specific folder.

3. Open a Word file → Write your name & ID → Then you need to attach all the images sequentially.

4. Then, you must convert the doc file to a PDF file.

5. Save the PDF file using this format: “your id number\_Lab Task 1\_MT”.

Example: 23\_\*\*\*\*\*\_3\_Lab Task 1\_MT.pdf

6. Then upload the PDF file in the MS team's “MT Task 1” section. And click on “Turn in” option.

7. Submission date and time : Nov 8, 2025 by 3:00 PM.
